

Dear Global Researchers in the disciple of Genetics, Molecular, Cellular Biology and related sciences,

It would be my pleasure to invite you and your colleagues for submission of a manuscript (review, original research article based on scientific/clinical research or computational in silico study, case studies, editorials, books review and letters to the editor) in our new Journal - Enliven: Journal of Genetics, Molecular, and Cellular Biology.

I am delighted to welcome you to our journal which will include scientists from around the globe in its editorial board. In addition, the journal will publish proceedings of conferences on all aspects of Genetics, Molecular, Cellular Biology and related sciences. We are anticipating manuscript submission from scientists from all regions of the world.

Contributing authors are requested to provide vision on related important features within their articles. This will empower the journal to provide an in-depth understanding of the current knowledge with respect to cellular and molecular level of genetics in normal and different diseases/disorders such as diabetes, cancer and neurodegenerative disorders. I'm confident that the journal will be widely read by junior and senior scientists in the field of Genetics, Molecular, Cellular Biology and related sciences. We hope this journal will hold a significant position in bringing awareness on a wide range of spectrum from biochemistry to molecular-medical sciences. The success of our journal, "Enliven: Journal of Genetics Molecular and Cellular Biology" depends upon contribution of global contributors to proceed towards indexing in major data bases to get good IF via ISI.

It will be highly appreciated for your participation through submitting manuscripts and providing referral recommendations of the journal to your peers and colleagues. The guidelines for submission are posted on the journal website: <http://enlivenarchive.org/submit-manuscript-genetics.php> or authors may submit their articles by mailing us as an attachment to genetics@enlivenarchive.org as well at this initial stage of establishment.

We are also currently seeking guest editors with good citations and Scopus h-index to launch special issues in their discipline.

We hope to join hands in building a successful future of the journal.

Prof. Mohammad Amjad Kamal
